

SEPTEMBER 1st Grade News

News from 1st Grade...

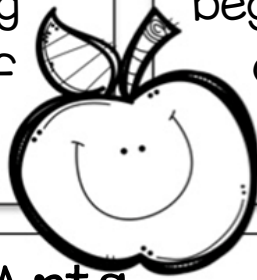

Welcome back Eagles! Each month you receive a monthly newsletter. This newsletter will cover what we will be learning in the classroom, important dates, and school information. We look forward to a great year working with you and your child!

Math...

The primary focus this month is adding and subtracting numbers up to 20. Students will use a variety of hands-on and mental problem solving strategies. We will also be starting to build an understanding of numerical place value.

Science...

Students will learn how to observe and sort objects like scientists. This will include sorting by shape, size, color, and/or weight. We will also begin to explore if objects sink or float.

Reading / Language Arts...

This month we focus on essential comprehension skills. This includes being able to both ask and answer questions related to the text.

We will also focus on reading and spelling short vowel words.

Please join us in encouraging your child as they strive to meet their individual AR goal.
